

## Civil Engineering Manager

[Apply Now](#)

Company: Dangote Industries Limited

Location: Douala

Category: other-general

### Job Summary

- Perform engineering duties in planning, designing and overseeing construction.
- Carry out maintenance of building structures and facilities.

### Key Duties and Responsibilities

- Undertaking technical and feasibility studies including site investigations.

Analyze survey reports, maps, drawings, blueprints, aerial photography, or other topographical or geologic data.

Inspect project sites to monitor progress and ensure conformance to design specifications and safety or sanitation standards.

Estimate quantities and cost of materials, equipment, or labor to determine project feasibility.

Provide technical advice to industrial or managerial personnel regarding design, construction, or program modifications or structural repairs.

Compute load and grade requirements, water flow rates, or material stress factors to determine design specifications.

Manage and direct the construction, operations, or maintenance activities at project site.

Test soils or materials to determine the adequacy and strength of foundations, concrete, asphalt, or steel.

Conduct studies of traffic patterns or environmental conditions to identify engineering problems

and assess potential project impact.

Identify environmental risks and develop risk management strategies for civil engineering projects.

Develop or implement engineering solutions to clean up industrial accidents or other contaminated sites.

Analyze manufacturing processes or byproducts to identify engineering solutions to minimize the output of carbon or other pollutants.

- Liaising with clients and a variety of professionals including architects and subcontractors.
- Resolving designs and develop problems.
- Undertaking complex calculations
