

## Distribution Control System Engineer (Instrumentation)

[Apply Now](#)

Company: Dangote Group

Location: Douala

Category: other-general

### Summary:

The Distribution Control System Engineer (Instrumentation) will be responsible for the design, implementation, and maintenance of the Distribution Control System (DCS) for the company. This includes configuring and programming the DCS, troubleshooting any issues, and ensuring the system is operating effectively and efficiently.

### Responsibilities:

Design and configure the Distribution Control System (DCS) to meet the specific requirements of the company.

Develop and implement control logic and strategies for the DCS.

Program and test the DCS to ensure proper functionality and accuracy of data.

Collaborate with other engineers and stakeholders to integrate the DCS with other systems and equipment.

Perform regular maintenance and updates to the DCS.

Troubleshoot issues that arise with the DCS and make necessary repairs or adjustments.

Maintain documentation and records related to the DCS.

Ensure compliance with all safety regulations and standards.

Stay updated on the latest advancements and trends in DCS technology.

## Requirements

### Requirements:

Bachelor's degree in Electrical Engineering, Instrumentation Engineering, or related field.

Minimum of 2 - 4 years experience in designing and implementing Distribution Control Systems (DCS).

Strong knowledge of DCS programming languages (e.g., Function Block Diagram, Sequential Function Chart).

Experience with configuring and integrating DCS with other systems and equipment.

Ability to troubleshoot and solve problems related to DCS.

Excellent communication skills and ability to collaborate with cross-functional teams.

Attention to detail and ability to work in a fast-paced environment.

Knowledge of safety regulations and standards related to DCS.

## Benefits

Private Health Insurance

Paid time off

Learning and Development
